

Test 1: Coconote PDF fixture

1 Motivation

This file exists solely so the Content browser has a real PDF row to render in the Coconote walk-through. Anything written here is fair game for highlight + anchor + comment experiments.

2 A tiny theorem

[Mean value] Let f be continuous on $[a, b]$ and differentiable on (a, b) . Then there is $c \in (a, b)$ with

$$f'(c) = \frac{f(b) - f(a)}{b - a}.$$

3 Notes

Use this paragraph to test the highlight tool. Try anchoring a selection and referencing it from the markdown side via `[[test1.pdf%fig1]]`. The right-click menu offers Retitle and Retag at the file row in the Content browser.
