

Test 2: Coconote PDF fixture

1 Background

A second PDF makes the Content browser look less empty. Together with `test1.pdf` it covers the two-pdf right-click menu paths (retitle / retag / rename / remove / delete).

2 An identity

Lemma 1. *For any natural n ,*

$$\sum_{k=1}^n k = \frac{n(n+1)}{2}.$$

The proof, omitted here, runs by induction on n . Highlight any line in this paragraph and assign an anchor named `proof-sketch` to practice the PDF anchor workflow.
